# Project R.I.F.T.

**suspense**

162 15 20

## Chapter 1 by Marshall Cavalli

Tape One (titled) Pacific Ocean, Earth: February, 11th 2016

"Hello, my name is Joan Robinson. My team of researchers at the DEO have found a cryptic document that we have put as classified. We are still trying to work on the information. There is no time to explain what this is, but it might try to change what we know now. More Information is on the way..." End of Tape One.

## Chapter 2 by Adam

Tape Two (titled) Pacific Ocean, Earth: February, 13th 2016

"Hello? Hello? Is this on? Ok, good. I have little time to explain, we don't know what happened but all of a sudden every electronic on-board went down. If anybody out there knows what we can do, please, please help us. We suspect the..**Static**..effect on our systems. All the computers, the screens, all show the same thing..**Static**..Please, help us."

End of Tape Two

Chapter 3 by Harlander

Excerpt from hand-written document

(date unknown but contents are as follows)

I'm writing this so that, if the worst happens, at least someone might find out what happened here. It all started after we'd deciphered the middle section of the Benthic Document.

It described a sequence of mathematical operations taking place in a theoretical Von Neumann machine. The sort of thing that's easy enough to run on any computer. So we built a system to run it, totally separate from the rest of the facility's network.

It still got out somehow. People thought the power cut was just an accident, but it happened so soon after the calculations started running.

What's more, I'm sure I can see patterns in the static. I found myself staring at a computer monitor yesterday, just watching it flicker. I swear I started seeing visions of shapes, stuff that looked like machine parts.

Then this morning I found Jones and Clathridge in the machine shop building something. This can't be a coincidence.

#### Chapter 4 by Carter Curti

Excerpt from hand-written document  
(found with other, date unknown)

I tried asking Jones and Clathridge what they were working on. They immediately tighten up and said it was just a side project. I keep watching the static patterns, hoping to find something.

The machine parts are still unknown to me. I am almost certain that they have something to do with what Jones and Clathridge are working on. Tomorrow we're going to finish deciphering the Benthic Document.

#### Chapter 5 by -

Hand-Written Letter  
(found in a bottle at sea)

Hello fine friend!

See more of Story Wars

If you are reading this, that means you found this bottle. I don't know if this will make any sense to you, but we finished deciphering the Benthic Document. The machine parts were connected to what Jones and Clathridge were up to, but as soon as I suspected

something, they threw me off the case. Now I'm floating in a raft, out at sea, so please come help me if you find this! The Benthic Document was also part of what Jones was up to, but he didn't mention anything to Clathridge, making that whole situation worse for the other crew members. Most of them were told not to question anything, but I couldn't help it. I have also stolen one of our electrical tools to see if I can decipher the shapes and other numbers that have now started coming up on the screen.

## Chapter 6 by Adam

Piece of a torn Blood-Spattered Paper  
(Found On Skeleton In Abandoned Life-Raft)

I have lost count of my time out here in this endless blue, the days have come and left rapidly. Losing time is the worst thing I could've done, so I have turned to writing this diary to keep myself sane.

I am no closer to deciphering anything, it seems like a lost cause so far. My only hope is to return to Camp Leviathan via a miracle and warn the souls at Project R.I.F.T: humanity's only hope. The Project was began by the government twenty years ago and was deemed to be the only thing that could save humanity from extinction. Sadly only the highest level scientists and researchers know any further information, but it has higher security than a CDC, so I'm scared to learn the project's secrets.

If I am dead before that then... I leave you all this one last message:

The Document Will Extinct Us All.

## Chapter 7 by [BLDE\_79] LeMaironi- merry chrysler

Encyclopaedia Definition of Benthic:

The benthic zone is the ecological region at the lowest level of a body of water such as an ocean or a lake, including the sediment surface and some sub-surface layers. Organisms living in this

zone are called benthos, e.g. the benthic invertebrate community including crustaceans and polychaetes.

Found on the life raft as well as a note from Jones. The disc could not be salvaged and we were unable to retrieve it. Inside the case was a note congealed by water to the album booklet.

I am without food. I am without clean water. I am without a communication device. A beacon went off in the far distance yesterday [this is true, on November 17, 2016, a strange light was seen at sea], leading me to believe that it is already too late. Jones and Clathridge have already killed us all. Please, by some miracle, sink that ship to the bottom of the sea and return that document and all it spawned to the bottom of the sea from whence it came.

It is too late for humanity any other way.

## Chapter 8 by Marshall Cavalli

Final Tape (titled) Calypso, Arizona: May 9th 2019

"Hello, this may seem strange but there is something you need to know. My name is Janet Hinderson and I am the last remaining scientist on Project R.I.F.T. I know this is shocking to say but there is more to the document then it seems. Joan was right, the document did extinct us all. It was a page from the Codex-Educatus. According to the legend, it is the book that gives us the formula of humanity and other creatures. Some believe that it doesn't exist and claim that is a hoax, but the proof is in my hand. If one were to look at it, it would drive the viewer mad. Mad. Mad. Mad. Ma- **static** Please... **static** ... help me... **static** Tape Ends.

the end
